PROFESSIONAL SUMMARY

Backend and Platform Engineer with 2+ years of experience building and operating production systems on Kubernetes - from REST APIs and distributed workers to Kubernetes platforms, databases and production observability.

TECHNICAL SKILLS

Languages: Python, JavaScript, Typescript

Backend: Node.js, Express, FastAPI, Flask, REST API Design

Platform/DevOps: Kubernetes, Docker, Terraform, Ansible, CI/CD, ArgoCD, Envoy Gateway API, NGINX Ingress

Databases: PostgreSQL, MongoDB, Redis, OpenSearch

Observability : Prometheus, Grafana, Loki, Tempo, OpenTelemetry

EXPERIENCE

Platform Engineer

Jul 2025 – Present

Pagesoft

Bengaluru, Karnataka

- Automated CI/CD deployment workflows for application services, reducing manual deployment effort and improving release consistency.
- Deployed and managed high-availability PostgreSQL and MongoDB infrastructure, including database failover, backups, and operational automation.
- Migrated Kubernetes ingress infrastructure to Envoy Gateway using the Kubernetes Gateway API, modernizing traffic management and routing.
- Deployed and managed HashiCorp Vault for centralized secrets management, PKI, SSH access, and dynamic database credentials.
- Replaced legacy VPN with NetBird mesh networking, improving secure peer connectivity and enabling fine-grained access control.
- Implemented OIDC-based SSO with Dex across ArgoCD, Grafana, and Vault, centralizing authentication for engineering infrastructure.
- Built Kubernetes KEDA autoscaling policies, cutting idle compute costs and handling 3x traffic spikes.

Backend Developer - Full-time

Sep. 2024 – Jul 2025

Pagesoft

Bengaluru, Karnataka

- Designed and built a distributed PDF processing system using Node.js and Python workers communicating through Redis Streams, enabling asynchronous processing of 5K+ documents/month.
- Self-hosted and deployed a complete open-source monitoring stack from scratch, including Prometheus (metrics), Loki (logs), and Tempo (distributed tracing).
- Owned end-to-end observability for 5+ production microservices, transitioning the engineering team from zero visibility to a fully mature telemetry culture.

Backend Developer Intern

March 2024 – Sep 2024

Pagesoft

Bengaluru, Karnataka

- Built REST APIs using Node.js and Express for user activity tracking and product analytics.
- Wrote unit tests for API routes, reducing bugs and ensuring code reliability before production deployments

PROJECTS

Attendance Notifier | *Python, AWS Lambda, Selenium*

- Built a serverless attendance monitoring system using Python, Selenium, AWS Lambda, EventBridge, and Twilio.
- Automated university portal scraping and sent daily SMS alerts, eliminating manual login checks.

EDUCATION

Kristu Jayanti University

Bengaluru

Master of Computer Application (MCA)

Aug. 2022 – May 2024

Patkai Christian College

Nagaland

Bachelor of Computer Application (BCA)

Aug. 2018 – May 2021
